EXAMINER

MOORTHY, ARAVIND K

ART UNIT	PAPER NUMBER
----------	--------------

2131

DATE MAILED: 11/29/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/759,402	Applicant(s) CYBENKO, GEORGE	
	Examiner Aravind K. Moorthy	Art Unit 2131	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 January 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This is in response to the amendment filed on 6 September 2005.
2. Claims 1-16 are pending in the application.
3. Claims 1-16 have been rejected.

Response to Arguments

4. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. **Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ulyanov U.S. Patent No. 6,578,018 B1.**

As to claims 1 and 15, Ulyanov discloses a method for encrypting programs for encrypted execution on a network having a remote host computer, comprising the steps of:

encoding a program as a unitary matrix with n rows and n columns

[column 13 line 61 to column 14 line 6];

encoding an input data string to the program as a vector of length n ,

wherein execution of the program on the input data string is realized by matrix

multiplication of the unitary matrix with the vector [column 16 line 1 to column 17 line 67];

loading the encoded program and the encoded data string on the host computer [column 16 line 1 to column 17 line 67];

executing the encoded program, using the encoded data string, on the host computer [column 16 line 1 to column 17 line 67];

communicating results from the host computer to the network [column 16 line 1 to column 17 line 67]; and

decoding the results into output representative of executing the program with the data string, wherein computations and data associated with the program and data string are unintelligible and useless at the host computer [column 15, lines 46-52].

As to claim 2, Ulyanov discloses that the step of encoding a program comprises converting the program to a unitary matrix multiplication [column 16 line 1 to column 17 line 67].

As to claim 3, Ulyanov discloses that the step of converting the program comprises converting the program to a unitary matrix multiplication U such that $U \in U_n$ for some integer n , where U_n represents a group of unitary matrices of size n [column 19 line 1 to column 20 line 44].

As to claim 4, Ulyanov discloses that the step of encoding the program comprises generating two independent identically distributed unitary matrices X , Y from the uniform

probability distribution over U_n determined by the Haar distribution [column 16 line 1 to column 17 line 67].

As to claim 5, Ulyanov discloses that the step of encoding a program comprises the steps of computing U' as XUY^* and communicating U' to the remote host computer over the network [column 16 line 1 to column 17 line 67].

As to claim 6, Ulyanov discloses that the step of encoding the input data string comprises converting the input data string to a vector b [column 16 line 1 to column 17 line 67].

As to claim 7, Ulyanov discloses that the step of encoding comprises the steps of computing b' as Yb and communicating b' to the remote host over the network [column 16 line 1 to column 17 line 67].

As to claim 8, Ulyanov discloses that the step of executing the encoded program, using the encoded data string, on the host computer comprises the steps of computing the product of XUY^* and Yb and communicating results to the network [column 16 line 1 to column 17 line 67].

As to claim 9, Ulyanov discloses that the step of decoding the results into output comprises computing X^*XUb , external of the host computer, to determine the multiplication of Ub as desired output of the programs wherein XUY^* and Yb is (XUb) and X^*XUb is obtained by matrix multiplication $X^*(XUb)$ [column 26, lines 6-42].

As to claim 10, Ulyanov discloses the step of decoding comprises decrypting at a control computer connected to the network and the host computer [column 26, lines 6-42].

As to claim 11, Ulyanov suggests that the network comprises the Internet [column 16 line 1 to column 17 line 67].

As to claim 12, Ulyanov suggests that the network comprises a virtual private network [column 16 line 1 to column 17 line 67].

As to claim 13, Ulyanov suggests that the network comprises a local area network (LAN) [column 16 line 1 to column 17 line 67].

As to claim 14, Ulyanov discloses embedding one or more constants into the input data string or program, prior to encoding, to detect incorrect execution or data tampering [column 16 line 1 to column 17 line 67].

As to claim 16, Ulyanov discloses that the control computer embeds one or more constants into the unitary matrix or data string, wherein the results from the host computer indicate tampering or incorrect execution of the encoded program [column 16 line 1 to column 17 line 67].

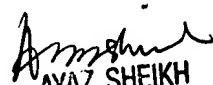

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aravind K. Moorthy whose telephone number is 571-272-3793. The examiner can normally be reached on Monday-Friday, 8:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz R. Sheikh can be reached on 571-272-3795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
